TSE/BSE Statement

GemCell[™] Human Serum AB

Catalog Number: 100-512

Lot Number: H122018

GemCell[™] Human Serum AB, Catalog number 100-512, Lot number H122018, is manufactured using methods to minimize risk as defined in the "Notes for guidance for minimizing the risk of transmitting animal spongiform encephalopathy agents via Human and veterinary medicinal products (EMA 410/01/rev.03)".

Bovine Thrombin material is sourced from the United States from herds located in a geographical area where BSE has never been detected. The cattle are slaughtered in a USDA facility where they undergo an ante- and postmortem inspection and declared free from disease.

The product was manufactured, processed, and handled in such a manner as to prevent cross-contamination with BSE-related materials. The product was not exposed to or commingled with any other animal origin material. Gemini operates under a cGMP and HACCP Quality System.

All human blood products are collected from stringently screened donors at FDA-licensed collection centers in the United States.
